THE **FARM** LOAN ACT

SHE federal farm long act, popularly called the "rural credits law," was signed by the president and became a law on July 17. The primary purpose of this act is to promote agricultural prosperity by enalding farmers to horrow money on farm mortgage security at a reasonable rate of interest and for relntively long periods of time. To attalu this object two form mortgage systems are provided-first, a system operating through regional hand banks and, second, a system operating through joint stock land banks.

To attract money to the farm loan field the act provides a method whereby those who have money to lend can find safe investments in the form of debentures or bomis of small and large denominations issued by the banks and based on the security of mortgages on

These two systems are to be under the general supervision of a federal farm foan board in the treasury department, composed of the secretary of the reasury as chalrman ex officio and four members appointed by the president. This loand has authority to appoint appraisers, examiners and registrars, who vill be public officials.

The Federal Land Bank System.

Umler the federal band band system he act provides for federal hand lanks, which make leans for the first twelve nonths exclusively through local national farm form associations composed of borrowers. These associations shall he shareholders in the banks, and in that way members who are borrowers will shure in the profits of the bank. The money for the loans is to come partly from the cupital of the banks and partly from the sale by the banks of bonds

PRESIDENT WILSON SIGNING THE FARM ments upon it.

LOAN ACT. The loan must

cured by first mortgages on farm ands. The net defines strictly the pur-cesses for and the conditions under repayment of the loan under un amor thres that the rate of laterest charged ent per unnum.

hito tivelve form loan districts, and a capital stock of not less than \$750,000. share 85, shall be established in each district. The hafederal Land bank may establish branches in its district. Within thirty days after the capital stock is offered for sale it may be purbought by the secretary of the frense cent it may for the l'alted States. It is proylded, however, that the sovernment shall not receive any dividends on its stock. Ultimately it is intended that all the stock in the lambs shall be owned by the associations of horrowers, and provision therefor is pade in law for transferring the original stock at part o these associations.

Notional Farm Loon Associations. The net provides for the reation of ent national farm loan associations. brough which it is contemplated that the federal land banks shall in the their loans. In the event that a local bon ssociation is not found in any locally Ithlu n year, the fisleral farm loon ourst may nuthorize a federal band through approved agests. Ten or more persons who own and cultivate farm land qualified as security for a mort-gaze loan under the act or who are about to own and cultivate such haid may form such an association, provided the uggregate of the loans desired by the membership is not less than \$20,000. Each member must take stock in his association to an amount equivalent to per cent of the amount he wishes to sorrow. This stock the association in turn, when applying for money from

Funda Available For Loans.

sonable Interest For Relatively Long Periods - Amortization Plan For Easy Repaymortgages, ment Prescribed

trust by the bank as security for the loans it makes through the association.
If a prospective horrower has no with which to pay for his assoclatica stock he may borrow the price of that stock as a part of the loan on his farm land.

Provides System For

Lending Money on

Farm Lands at Rea-

Under this plan, then, every horrower must be a stockholder in his local association and every association a stock older in its district bank. Each stockhelder in an association is liable for the acts of that association up to twice the amount of his stock.

How Lonna Ara Obtainad. member of a national farm loan asnoclation before obtaining a loan must first fill out an application blank supidled to the loan association by the federal farm loan board. This application Idank and other necessary papers will then be referred to a bean committee of the association, which must appruise the property offered as security. Such application as is approved by the lonn compilties is then forwarded to the federal land bank and must be investigated and reserted on by a salarled approiser of the bank before the loan is granted. This appraiser is required to havestighte the solvency and character of the prospective horrower as well as the value of his hand. When a loan is granted the amount is for-warded to the borrower through the

loan association. The act specifically defines the pures for which loans may be obtained. These are:

(n) To provide for the purchase of fund ericultural ass. To provide for the purchase of equipment, fertifizers and live atock necessary for the proper and reasonable operation of the mortgard farm, the term "equip-ment" to be defined by the federal form

(c) To provide buthlings and for the traevenient of farm tools, the term "tur-evenient" to be defined by the federal To liquid ite indebtedness of the own-

(it To liquid the fatcheriness of the owa-er of the laws mortaused estating at the time of the resultation of the first na-tional farm two association established to or for the estaty in which the fault mort-gared is similed or indebtedness subse-quently between fir one of the purposes mentioned in this section. Loans may be made only on first

wortgages on farm land. Unly those who own and cultivate

farm lund or are about to own and cultivate such land are entitled to borrow. No one can borrow suve for the par poses stated in the net, and those who after borrowing do not use the money for the purposes specified in the mort gage are liable to have their loans re-duced or recalled. The secretary-trees. urer of each association is repilred to report nny illyerslon of lorroyred monnortgages.

No ladividual can borrow more than \$10,000 or less than \$100.

No long may be made for more than to per cent of the value of the land mortgages) and 20 per cent of the value of the perimment lusared improve-

The loan must run for not less than five and not more than forty years.

Every mortgage must provide for the forms are to be made and re-that the ratio of the land ren farm bans shall not exceel n per ments sufficient to ricct all interes: and pay off the debt by the end of the United Spites shall be clybted term of the lan. The last illustrate as quired will be these published in unortization tables to be prejered by the farm loan board.

The Interest Rate Paid by the Bor-

No asternt land bank is permitted to Charge more than 6 per cent per annum. on its farm morthage boins, and in no chased at par by may one. The cenfter case shall the interest charged on farm the stock remaining misoid shall be interested by those than I per case shall the interest charged on farm cent the rate puld on the list Issue of

For example, if the bank pays only 4 not charge more than a per cent for the next farm loans it makes. But of this murgin of not to exceed

I per cent, together with such amounts us it can earn on its puld in cash capltat, the lank must set aslde restain reserves and meet all its expenses. Any bulance or not profits can be distributed us dividends to the loan associatlons or other stockholders. The long associations from their bank dividends, after setting ashle the required reserves and meeting expenses, can deplace association dividends to their members. In this way the profits, if any, will be distributed among the boy- aselstance, rowers and will to that extent reduce the amount of Inter-st netually paid by

The federal hard banks are specitivally problidted from charging in connection with making a loan any fees or commissions which are not authorized by the farm lean board. The nuther-ized fees need not be puld in advance, but may be unde part of the loan.

Amortization Plan of Repaying Loans. It has been sald that all loans are to holds in trust us security for the mem-ber's individual loan. The association Thiu plan calls for a number of fixed unnual or somiannual payments, which the bank, must subscribe for stock in include tot only ull interest and the lank to an amount equivalent to 5 charges due the bank, but the prinper cent of the sum it wints to obtain cleal as well. These payments are so for its members. This stock is held in culculated as to extinguish the debt in

a given number of years. After five years the borrower has the right on any luterest date to make additional payments on the principal in sums of \$25 or any multiple thereof, time dis-charging the delt mere quickly.

After a federal land lank has leaned to first mortgage \$50,000 it can totaln permission from the farm loan board to Issue \$50,000 in farm loan bonds based on these mortgages, sell such bomls in the open market and use the money thus obtained to lend on other

This process of lending on mortgages and selling bonds in Issues of \$50,000 may be repeated until bonds to the amount of twenty times the lank's joild up enjoint are outstanding. If each bank should have only its required minimum raid up capital of \$750,000 this plan will provide eventually, if all the authorized bonds of the twelve lunks are sold, over \$180, 1000,000 to lond on first mortgages on farm land. The banks, lowever, can lucrouse their cupital stock alove the required minimum and so increase the amount of bonds they can sell and thus lucreuse the total nmount of numer available for lonns on farm mortgages,

To make these bonds attractive to hivestors the bonds, together with the mortgages upon which they are based, are exempted from federal, state, mualcipal and local taxution and are made legal investments for fiduciary and trust funds. The cupital stock of the federal land banks is also exempt from taxution. Pederal reserve bunks and member banks of that system are empowered to buy and sell these bonds. They are to be issued in denominations of \$20, \$50, \$100, \$500 and \$1,000.

Organization of Banks.

The temporary management of the federal hand banks is to be in the hands of five directors appointed by the federal farm loan loand. As soon. however, as the subscriptions from the loan associations total Slorous regular directors are to be appointed as follows: Three district directors, resident in the district, shall be appealated by the federal furm loan loard to reprewent the public interest, and six to all directors, resident in the district, shall be elected by the farm burn associations, who must be stockholders in the bank. The federal farm lan board shall designate one of its appointees to act as chalrman. The act requires that at least one of the three district directors shall be experienced in farm ing and actually engaged at the time of his appointment in farming operations within the district. Any compensation pald to the directors must be approved by the federal farm loan Iward.

Each form association must have a teard of directors and a secretary treasurer. The directors shall serve without pay. The secretary treasurer shall receive such compensation as may be determined by the board of directors. The association must appoint an appraisal committee for the purpose of valuing lands offered as securlty for loans. No member of such committee shall have any interest in

the property upon which he passes.

To provide finds for current expenses the burn association may retuln as a commission from each interest payment not to exceed one eighth of 1 per cent semiaunually upon the from the purposes stated in the unjudy principal of the loan. Tilds commission is to be deducted from the dividends payable to such farm been association by the federal land bank If the commissions are not adequate and an association does not wish to assess members for current expenses It may borrow at'll per cent from the federal land bank to an amount not be exceed in the aggregate one fourth of Its bank slock.

The law requires both the lamb banks and the farm loan assectations to make provision for certain reserves before they can have any distillment.

In sections where been conditions do not make the formation of associations practicable the farm born board may authorize the federal hand lank to make loans through agents approved by the board. These arents are to be banks, trust companies, mortgage companles or savings institutions chartored by the state. They may receive as compensation the actual expense involved in transacting the loan and in addition thereto a sum not to exceed one-balf of I per cent per unnum on the unjust principal of the bons made through them. When the form bem board decides that a beaulty is adequately served by farm loan associathous no further bonos are to be made through agents.

In addition to the system of twelve federal land tanks and the matteral farm lone associations of herrowers the act parmits the establishment of foliat stork land banks no I nutlicetizes them to carry on the besiness of lending directly to barrowers on farm mortgage country and Isother farm bean bonds. These bends noist have a suplind of a of less than \$250,000. The are under the enjervish a of the fed eral farm bon bord, but the govern ment does not tend them any thornelal

General Provisions.

The law, through the farm loan board, provides the necessary muchinery for frequent examinations of the lanks and the associations, for the proper cancellation of mortgages and for the safe custody of mortgages offered as security for bonds. When any mortgues offered as scentilly for bonds is withdrawn the bank is required to replace the menrity other mortguges or with other satisfac

Heavy pencities of fine or imprison-ment or both are imposed for violations of the act, malfeasance in office, frund, embezzhenent, defalcallon o ther lliegal practices.

Make War on Flies: Ward Off Disease

In order to make this community a hetter place to live in, we must declare war on the house fiv at once. If we do not slip up on him and strike the first hard smashing blow, he is going to come at us in overwhelming numbers.

How may we successfully fight the ity destroying or removing his theeding place, the manure pile, removing all garhage and making the privy vanit fly-proof, and by keeping our yards and alleys clean. We must sereen our houses and use the awatter

Where is the fly horn? In tilth, generally in horse manure and outhouses. semetimes in the flesh of dead and rotting animals-nover in any clean. wholesome place. The life eyele of the thy's birth runs about ten days from the timo the egg is laid until the mature insect is horn. A magget is hatched from the egg. The maggot becomes a burna (a state corresponding to the tadpole state in frog life), and the pupa becomes the mature fly that helps to make life miserable for us in seirm weather.

Flies Live in Filth

Where does the fly live? Where there is fith, and there is nothing ton tillle for the tly to cat. He eats rlead food also, but his apecial delight seems to be wallowing in fifth, then buzzlied into the house and wiping his feet nul wings on substances you are about to

tually exterminate files is to make an manure piles with a simple kerosene organized effort. Our municipal au. solution every day or so, frequent rethorities and health officers should moval of manuro piles, screened map out a campaign immediately and tollets, covered garbage cans and the enlist the active aid of everybody in the community.

Don't Ignore Fly Menace

Many persons do not realize what a rious menace the fly is to the health f this community. It is characteristic of the average man to ignore this kind f dnnger until it threatens his own amily. "Oh. the fly may he the means of earrying a fatal disease to some puny person," you reason, perhaps, "but there's no danger of his bringing it to me-I'm in pretty good shipe eat three squaro meals a day and sleep

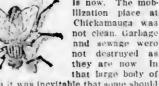

This Season

ali right." That is a characteristic attitude of soldiers. Rather, it used to be so. floubtless you remember the awful toll of life taken among the soldlers encamped at Chickamauga during the Spanish-American war. If you do not you can easily look it up. Those boys in blue "lifed like files." Flies caused the death of most of those stricken with typhold and dysentery.

It came about in this way, iluman excreta carries the hacteria of typhold piaint, tuberculosis and intestinal diseases of other varieties. Files feed on human excreta, as you know if you have kept your eyes open.

The Lesson of 1898, Not a great deal about the value of camp sanitation was known in 1898.

The American army medical corps was not organized as it Is now The mob-Illzation place at Chickamauga was not clean. Garbage and sewage were

men it was inevitable that some should be disease carriers. The waste matter which they threw off acted as an inembator for the bacteria which it carrled. Files and other insects, but espermity flies, swarmed around the fifth sinks and foil. They were a frightful annoyance at meal time, and tany sere the army's most deadly enemo for they distributed dangerous germs among all the meu. As a result fever and howel diseases became almost an epidemic. As a action we were taught a solumn lesson about the mentic of insects. Our army medical men i arned more in the Chilppines, in Caba, in Porto Rico and in the Canal Zone about the relation of files, me just his and bee to the spread of distance than the nearest open window or door and enexlously been fearned in two or three thousand years.

Cleaner Than Homes. Visit any of our army encampments today. They are kept cleaner than the What does he do in these places of average housekeeper keeps her premploration? FLIES LAY EGGS IN MANURE

Stable Dung Should Be Sprayed and Removed Often, Says Sanitary Specialist.

"The most effective method of controlling files is by preventing fly breeding," says Dr. W. A. Evans, an eminent health authority and publieist. "As a rule this means that no cellection of moist manure la to be left accessible to files for as long as a week during hot weather.

"Fly eggs and larvae live for a week; in hat weather la moist manure. Therefore, if manuro is hauled away and spremi oftener than once a week if will not breed flies. The advantage of a daily removal is that it means no manure boxes, manure pits or minure plies, and practical experience proves that give a stable an inch and it takes nu ctl.

"The only places that have entirely conquered the fly nulsance remove manure daily. The only manure receptacles are small and portable. if prompt removal is not possible the ment with chemicals.

"The methods of trentment advised by anthorities are with hornx, or cole manito, or sulphate of iron. If the mount of manuro is small and a good deal of ground is available, spreading in thin layers on the ground at interthree days or less is feasible an ! e!!leient."

CONFESSIONS OF AN EDITOR.

One of the most difficult of the editor's jobs is to get facts about births,

marriages and deaths. People seem to think he ought to know these things by intuition. If not that, the birth morseful way to the 'conscience fund' marriage or death is of such importance in the national treasury, passes over the desk of George R. Cooksey, private by some such wireless or just grow into the information. Then, when the paper Sympathetic and imaginative, and a newspaper writer hy profession, Mr. comes out, and no mention is made of the event, the editor is plamed for not running a good newspaper or not getting that are often feigned in penmanship good many people in this county. If the editor knew each one of them hy name, besides their family history and

Don't Buy a Wagon Until You Have Seen the Columbus

Before you decide on any wagon, examine the Columbus. Strongly built of the best possible material the Columbus wagon gives the most satisfactory service for the longest period of years. There is no secret in the notedly long life of the Columbus wagon. It is the result of the methods employed in construction. There is no wood in this wagon which has not been air-dried under shelter from one to two years.

The axles and the spokes of the wheels are hickory; the hounds, bolslers and sandboards are oak, and the boltom of the box is straight grained flawless pine. These are just a few examples of the care which is taken to make this wagon as reliable as possible. The result is that the Columbus wagon is unheatable in reliability and endurance. Come in and examine it for yourself. We know you will be pleased.

YOUR WEDDING STATIONERY

The Correct Forms For Various Cards and Invitations That Stand For All the Difference Between Correctness and Poor

OT the least important of the many items pertaining to wed-ding preparations is the wedding stationery. First of ail, the bride should be well supplied with small note paper or correspondence cords upon which she acknowledges her gifts and the receipt of all measures of congrutulation. Both note paper and correspondence eards are per-fectly correct, and they should have the bride elect's initials or monogram engraved either in gold, colors or embossed in white on the upper left hand corner of the sheet or in the center

tienr the top, Wedding tayitations and anneuncements should be Issued in the tornes of the bride elect's parents or parent (if one is deceased) or a backets brother, a married brother and his wife jointly or a unriled sister and her busband jointly. Grandparents or on uncle and unit or a guardian may also take the honor.

The invitations should be sent out not less than two weeks prior to the thate set for the ceremony. Autouncements, of course, are never mailed un-th after the marriage has taken place. The tecelot of an invitation be a wedding reception, bome wedding or weddlag at a hotel detureds an immediate mewer, but a wedding announcement requires no neknowledgment.

Questions are often asked concerntug the etiquette of the wedding in-vinition. "Respiects the pleasure of your company" is the most cordial in-vitation to a home webling, when a reception follows the ceremony that in the case of a church wedding the form "requests the homor of your presence" is used.

When the wedding does not take place at the bride's forme a reply card pay be inclosed, indicating the midress to which replies are to be sent. Another form is to engrave the home address at the left hand corner of the tuvitation.

A third form of indicating the addiess is to engrave or emboss it upon the dap of the outside envelope, When the bride has no parents or

near relatives westding automacements are often issued by the bride and groom

The vegue for using paper that is paneled for wedding invitation and announcements still continues. Moderic Hoioan letters, old English and the various combinations and modifics. thous of these are shown for the more exclusive wedding taytorloos, for they are more expendive, but a medium beavy engraved English script is always in good taste and fulfills all the

TAKE CARE OF THE HAIR.

The Value of Sun Bathe For the Scalp.

The fair needs greater care during the smomer months than ut any other time of the year. The reason for this ts shaple. During the warm months the average woman is out of doors a good deal more than during cold weather, and her scalp is exposed to dust and dirt more frequently than at any other ly to the expense. It is well to take senson. Often she goes furtheaded about a plat of the dried petals and when playing golf or teams, allowing the sum's rays not only to bake, but p score it the delicate libers of her hair. This results in a brittle, blenched colffure at the end of the summer, a head that is anything but lovely to look

While warm weather is decidedly disastrons to the condition of the scalp ing up two thrends of the proble, ti tr. Fish Fiske Omelet.

Beat four eggs sensoned with a half teaspoonful each of salt and paprika until whites and yolks are well mixed. Add four inblespoonfuls of water and a can of tish tlakes picked in bits with n silver fork. Melt a tablespoonful of butter in a frying pun und turn in the lish mixture. Shake the pan back and furth on top the hot stove lld, tipping the pan meunwhile to let the uncooked mixture down upon the pan. When the egg is nearly set roll the omelet and turn on to a hot plate.

Shaded Ostrich Bose. In order to stimulate the interest in feathery neck trimmings, the manufactrick boas, very long and duffy. Begin gradually deepens until at the other it is of deepest hue.

She Scorned Pity.

Nothing was more remarkable about the wonderful blind hymn writer, Fanny Crosby, than the way in which she refused to be pitled. If a culier started to express his sympathy in her affliction, she laughed at him. "Why; bless your soul," she would say, "I am the happlest woman alive! My sightlesaness has brought me unnumbered blessings. If it had not been for that, I should not have written my hymns."

HOW TO MAKE ROSE POTPOURRI

This Is Just the Season to Use Falling Flower Petals and All Fragrant, Colorful Bloom to Spice Away For Bleak Winter

T is a good blea to look about your neighbors and friends' gardens just now, not covernity, but with an eye to starting a potpoarri. Your friends and probably your neighbors will volunteer to save the petals of their roses for you. It is a good plan to gather these early and pick up all that lie on the ground, but you must use only the clean, moist ones that have fallen during the early morning hours.

If you have your own rose garden sacrifice a few blooms before they have reached their fullness. They add, greatly to the strength of the perfumo in a finished jar. Pinch or twist them from the stalk, trying to keep them intact

Put your pathered pose petals he a dry, sindy room. Sprend a few thicknesses of white paper over a table or tray, sprinkle the petals loosely on this and sait then generously. Pach morning as you add your fresh supply jush. the others aslde. When you are per feetly sertain that the obliones ore draplace them in a covered jar or dish, sprinkline them again with suit. Toss them about a little each day for about two weeks

If you desire you can not other flow ers, such as violets, hya inths, honey suckles, veclera or may highly scented and colored 143 these separately. Mix sparingly with your rose petals after all are ready for receptacies.
The color in these different blooms adds a tright note to the finished pot pourt.

After you have supplied yourself with sufficient dried loaves secure a large, tightly covered jar. A regulation gailon fruit far will nuswer for the first mixing. Piace in the bottom of the jar about two onness of broken clummun stick, two ounces of whole alisphe, a tenspounful of grated dry orange peel and the same amount of dry lemon peel; add about ten whole cloves. Fill the far with alternate layers of the petuls and salt. Cover and allow to stand for at least a month, then prepare your perfumes.
You can jurchose at any druggist's

or novelty storo invender flowers. You will need two packages of these for a gallon of petals. He very certain that they are fresh. You can tell by the odor, and never risk even a slight doubt, as bevender can do much damage if not selected carefully. Mix with these two outpus of ground cloves, cinnamon and one ounce of shredded or

You will require another air tight jar to pack the combination away to ripen This jar can be used for nit your stock in trade, as adding other dried leaves after a period of time will not do any

your fancy or pocketbook. However, should you choose a little oil of rose gernulum, verbeng or any favorite scent it will be all that is necessary to make it delightful and not add greatand to the limit of your purse strings ed "reast," and he each package piace a little of this mixture to give the whole a tang. This is but a natter of choice, us the regular given spices with one or two oils will be most satisfac-

Everything is now ready for the permanent receptacle. Sprinkle a layer of petals and a layer of the spice, a few drops of oli of rose geranium and a layer of salt. Alternate until the jar is tilied, then pour over the whole a plat of good cologne water, the best you can purchase, and you are ready to seal. Be certain that your receptacle is air tight. Allow it to remain unopened for six weeks. At that time you can add more dried petals should you think the mixture too pungent.

++++++++++++ LINGERIE DRESSES.

COMMISSIONER'S. SALE OF LAND.

GARRARD CIRCUIT COURT.

James I. Hamilton, et al.

Clyde Pollard, et al, Pursuant to a judgment rendered at the March Term, 1916, the undersigned Commissioner will sell at public suction before the Coart House Door in Lan-caster, Kentucky, at 11 o'clock, A. M.

MONDAY, AUGUST 28, 1916,

it being the first day of the Garrard County Coart Term, the real estate mentioned in the pleadings and de-acribed as follows:

Located and being in Lancaster, Gsr-ratd County, Kentucky, consisting of a house and lot containing about 31 acres of land, situated on the South side of Danville street in said town and bounded on the North by Danville street East by the Shagars property and on the South by Nick Leavell, (now Dunc & Wm. Arnold) and on the West by Anderson property and Pamphrev property, and contains 3½ acres more or less, being the property conveyed to George Follard by J. II. and Mary Ward by deed dated July 18, 1904, and recorded in Deed Book 19, page 567, Garrard County Clerk's Office.

The purpose of the sale herein is to divide the proceeds arising from the of land, situated on the South

The purpose of the sale herein is to alivide the proceeds arising from the sale of the property among the joint owners as their interest may appear after paying the judgments which fix a lien upon the interest of a number of the joint owners herein fixing the appearant to be said. mount to be paid out of the proceeds of

TERMS:

The sale will be made on a credit of six months and the parchaser will be required to execute land with approved required to execute land with approved security for the purchase paice, said bond bearing six per cent interest from date until paid, having the force and effect of a judgment upon which execution roay issue, payable to W. II. Brown, Master Commissioner of the Garrard Circuit Coart, and a lien will be reserved upon the property sold until the purchase money is paid.

W. 11. BROWN, M. C. G. C. C. L. L. Walker, Attorney for Plaintiffs, Capt. A. M. Hourne, Auct.

ASSIGNEE SALE.

By virtue of a deed of assignment, and under an order of the Garrard Circurt Court, the undersigned will, on the

28th DAY of AUGUST 1916

about the hour of 11 o'clock A. M , sell about the hour of 11 o clock A. M., self at public aaction to the highest and best bidder, before the Court House door in the city of Lancaster Gerrard County Kentacky, on a credit of aix and twelve months, the following dea-

and twelve months, the following deacribed property.

Located in the City of Lancsster, Garrord County Kentucky, on the weat side of Stanford Street and bounded as follows; Lots No. 4 and 5 beginning at a stake in the middle of Stanford street, thence with the middle of Stanford atreet, thence with the middle of same N 2½ E 6 poles, to a stake, thence N 85 W 27.36 poles, to a stake corner to lot No. 4, thence S 2½ W 6 poles to a stake, thence S 85 E 27.40 poles to a stake, thence S 85 E 27.40 poles to the beginning, containing 1 acre and 4 poles.

Lot No. 6 beginning in the center of Stanford street, thence N 85 W 29 poles to a stake corner to lot No. 5, thence S 2½ W 61 poles to Ashley, a stake on William Wherrits line, (now Gills) S 87½ E 10.16 poles, to Ashley (now Davis and Joseph) thence their line 2½ E 6 poles to the beginning, containing 1 acre 1 vod and 25 poles.

and Josephi thence their line 22 E 6 boles to the beginning, containing 1 acre 1 rod and 25 poles.

Also another lot or parcel of land in said town of Lancaster Kentucky, being the residue of lot purchased by W. M. Kerby of John Logan and othera, by deed dated March 6, 1882 and on record in the Garrard County Clerka office and conveyed to said Kerby ofter. office and conveyed to said Kerby ufter having sold a portion thereof to Thomas Carrell adjoining Kinnaird and Gill, and lots 5 and 6 herein before conveyed, all of said linad is in one body and the Assig nee will first offer said land in two tracts, the one including the house and garden and described as follows; a line commen-cing at north corner of residence lot on Stanford street, and running back west with said line to the west line of asid lot, thence N to the line of Mrs. West, her corner, thence east to the corner of this lot, with Mrs. West, thence north to the beginning.

The other tract described as fol-

lows, adjoins the faregoing boundary on the north, Stanford street on the west, on the south by Rainey and Gill Heirs, and west to the western boundary of said lot.

A passway to be loade by the owners

of both lots, is adjudged along the line of these lots, and between these two lots, 12 feet wide.

The Assignes will offer said Lots separately and then as a whole and accept the bid or bids that bring the most maner.

The purchaser will be required to

execute bonds with good surety, bearing interest at the rate of six per cent from date until paid, and u lien will be retained as additional security upon the said lots. This the 1st day of August 1916,

JAS, A. BEAZLEY,

Assignee of Adu Kinnaird.

Too Fast for Her. A little girl from a more leisurely

part of the country was walking with her mother along that part of Broadway which skirts the Woolworth building. It was the noon hour, and the crowd was out and in rupld motion. The air was strong and gusts of it scurried past us they do in that vicinity. "I don't like New York, mother," said the little girl. "Every "I don't like New York. thing is in such a hurry—even the wind."

Our Diet.

One fundamental principle is that he diet, considered for any reasonable ength of time, must supply a great variety of chemical substances com-olned in different ways for the 'structural" needs of the body, and "Well, Chester," suld ing substances with which it may perits make-up or scant in quantity.

Why Depend on Somebody Else?

Universal Military Service Can Be Effected in United States Without Trace of Militarism or Departure from Ideals

By MAJ. GEN. LEONARD WOOD
Commander Department of the East, United States Army

The military systems of Switzerland and Austria appeal to me very strongly as models which we could follow to our advantage in all which pertains to military training. Switzerland has had her system in operation long enough to make its application general, and as a result, while a peaceful, orderly country, she stands always ready to defend her rights and to guard her territory. She is absolutely free from all indication of militarism, as ordinarily understood, and yet every man in Switzerland who is physically fit has received a

MAJ. GEN. WOOD sufficient amount of training to make him an effective and efficient soldier; that this has served to benefit and uplift the people is conclusively shown by her low criminal rate, which is only a fraction of ours, and by the admitted conservatism of her people, their law-abiding habits, their patriotism and their respect for the rights of others. Contrust her position of today with that of another small European country, which, unlike her, had not made due preparation.

In both Switzerland and Austria a large amount of instruction is given through public schools or during the school period of the youthso much, indeed, that only two or three months of intensive training in eamp are necessary to complete training of the soldier. The officers take a longer and more intensive course, but the system in both countries is worked out so that there is practically no interference with the industrial or educational careers of those under training.

There has been little or no interest in this country in this great question of military training. There has been a general haphazard policy and a blind dependence upon volunteers; in other words, a dependence upon someone else doing one's work. It is an illogical system. There is no reason why one group of the population should assume that another group is going to voluntarily perform their military duties.

The obligation to military service is universal. It is a tax upon which all others depend, and a nation which fails to recognize this prepares its own downfall. This general training can all be effected as has been done in Switzerland and Austria without a trace of militarism, without any departure from ideals, and with a great resulting improvement in the morale, physique and character of our youth.

In Switzerland and Austria the training of young boys is principally of a calisthenic character. Later they pass to ritle shooting and military formations. The final finish is put upon them in training at the eamps which immediately precede their entry into the first line of the country's

You must not think that war is one of the great destroyers of human life. It does take many lives, but it is among the lesser eauses of loss of life. Our industrial casualties of all kinds amount to something over 450,000 a year. Of these, about 78,000 or 79,000 result fatally—a loss rather exceeding the average loss of life of two years of the Civil war. Most of these accidents are preventable. The public interest in life-saving is not sufficiently keen to insist on adequate legislation to this end. The losses in the war are more dramatic, more startling, but the lives lost in every-day work in the struggle for existence exceed them vastly in number and run on without ceasing during both peace and war.

The following is a little illustration of the ease of our own country, namely, in ten peaceful Fourths of July (the last July 4, 1910), approximately 1,800 persons were killed and something over 35,000 wounded in celebrating the success of a war which ended nearly 130 years before. The number killed equals the number killed in battle or who died of wounds in the Spanish-American war, the Philippine rebellion and the Indian wars of a number of years preceding. The wounded of these ten peaceful days aggregate seven and a half times the wounded of all these wars. I tell you these things not to prove that war is any less dreadful, or that you should strive less to avoid it, but simply to present to you the truth with reference to the causes which bring about the loss of life.

Do not give up your ideals. Strive for universal peace, but while striving do not forget the conditions under which you are living, and, however much you may hope to obtain a condition of world peace, remember that there is no evidence of it today and that if we want to preserve the institutions which have been handed down to us we must be ready to defend them.

All Force Not Immoral!

There are, of course, persons who believe all force is immoral; that it is immoral to resist wrongdoing by force. I have never taken much interest in individuals who profess this kind of morality; and I do not know the extent to which they practically apply it. But, of course, if they are right in the theory, then it is wrong for a man to endeavor by force to save his wife or sister or daughter from rape or other abuse, or to save his children from abduction and torture. It is a waste of time to discuss with any man a position of such folly, wickedness and polyroonery.

THEODORE ROOSEVELT.

The Nation That Can't Resist

All must admit the importance of an effective navy to a nation like ours, having such an extensive seacoast to protect. The nation that eannot resist aggression is constantly exposed to it. Its foreign policy is, of necessity, weak and its negotiations are conducted with disadvantage because it is not in condition to enforce the terms dietated by its sense of GROVER CLEVELAND. right and justice.

The Exhaustion of Europe

Europe will be poorer after this war, but she will have at the close of the war millions of highly trained veteran warriors, and in these armies there is menace to the United States. It was because the United States had a million veterans at the close of the Civil war that Maximilian's dream of an empire in Mexico was suddenly dispelled. We expelled an invader then without even making a demonstration, because France knew that we had veteran soldiers with which to enforce our demands. - Conference Committee on National Preparedness.

Buying Aeroplanes for Peace

People of United States are Seeking Protection from Possible Dangers by Raising Big Fund From Popular Subscriptions

By HENRY WOODHOUSE, Governor of Aero Club of America

Ten thousand starving British troops besieged by the Turks in Mesopotamin were fed recently by six neropianes belonging to the relief expedition, which carried 18,800 pounds of food to the besleged-many days before the relieving expedition got within communicating distance. Unfortunately there were only six aeroplanes—and they could not carry sufficient provisions for men and beasts, therefore the 10,000 soldiers bnd to surrender with relief in sight!

This lesson makes us believe what Earl Kitchener meant when he said that- An aviator is worth an army

Appreciating the value of the aeropiane, just before the outbrenk of the European war the people of France by a popular subscription participated in by men and wom-WOODHOUSE, en of nil classes, raised 6,114,846 francs for the purchase

of neropianes and the training of avintors. This spontaneous action was taken because the government had failed to provide adequate aeropiane equipment for the army and the navy, although the utility of the aeroplane had been demonstrated in the military maneuvers. Had the French people not done so the French republic might today he in its inst threes, for without aeronlanes in goodly numbers, France would have had a blind army. The popular subscription gave France 208 aeroplanes, 62 landing stations, and 75 trained aviators. The interest created by the subscription led to the interest created by the sub mediate consideration by the government of its aeronautical needs with the result that in April, 1914, the French army had 1,200 aeroplanes and 28 dirigibles. Germany in 1912 also had a popular subscription for this purpose and raised 2,234,506 marks, and the general interest which attended the creation and disbursement of this fund caused the government to provide \$35,000,000 for aeronautics.

in the National Aeroplane Fund the people of the United States are doing what the people of France did, for the government of this republic like that of the French republic, has fulled to make ndequate provision for the aeronautic needs of the army and the navy, though grave dangers the nation. In the last twelve months there has been given to the National Aeroplane Fund about \$500,000 in sums ranging from \$1 to \$10,000 and with these subscriptions the officers of the Aero Club of America have been able to provide neronautic equipment and pny for the training of officers for the National Guard and the navai militla of 35 states.

In the earlier days of this natiou some residents living far inismi AEROPLANE HAS PUT EVERY CITY AND of bombardment, but the aerthought of war only HAMLET ON FIRING LINE.

oplano has so changed the science of war that every city and hamlet is now in reality on the firing line In the present war dirigibles have made trips of 1,000 miles to hurl down tons of bombs on the noncombaiants of peaceful cities, which by reason of distance and isolation would have been absolutely safe before the development of the aeropiane. Now the only effectual protection against aerial attacks is with aeroplanes flown and officered by picked men of great skill and even greater daring; hence the necessity of thousands of aeroplanes with dependable sviators for the protection of this nation with its immense coastline and unde

The money raised by the National Aeroplane Fund is used in the purchase of neroplanes which are presented to the militia or to the navni militia end in paying for the training at aviation centers of members of these two arms of defense

In ten months since the National Aeropiane Fund was instituted by the Aero Club of America, aviation detachments, or stations of the nero coast patrol system, have been established as follows;

In New York, in connection with the aviation sections of the National Guard, and the first and second hattalions of the naval militia, each of which been presented with asropianes through the National Aeropiane Fund; and in Buffalo, under the auspices of the militia and the Aero club of Buffalo, which has raised \$10,000 for this purpose.

In Maine, under the auspices of the militia and the chamber of com merce of Portland, which has raised \$10,000 for the first station. In Rhode Island, under the auspices of the militia, \$25,000 having aiready

In New Jersey, under the auspices of the militia, a hydroaeropiane and training for officers having been presented. In Massachusetts, under the auspices of the militia and the Aero club

New England, Mesers. Godfrey L. Cabot, Charles Fearing, Norman Cabot and other prominent Bostoalans have acquired two powerful aeroplanes and an additional fund of \$10,000 is being raised. The Burgess company has also put its own station at the disposal of the militia. In Michigan, under the auspices of the militia and the Aero club of Michi-

, which is raising a fund that already amounts to \$12,000. In California, under the auspices of the militia and the Aeroaautical so elety, an aeropiane having been presented recently by Olean L. Martin, and a fund close to \$2,000 having heen contributed to the National Aeropiane

In Illinois, under the auspices of the militia, the Aero club of illinois and

the W. H. Cochrane syndicate of Chicago. In Virginia, under the auspices of the militia, a \$10,000 fund being raised for the purpose, haif of which has already been subscribed. The Atlantic coast aeronautical station, located at Newport News, has also put its facilities at the disposal of the militia.

In Colorado, under the auspices of the militia and the Colorado Aero club, a \$100,000 fund is being raised.

In Missouri, under the auspices of the militia, the Aero Club of Kansas City and the Missouri Aeronautical society, which is raising a fund of \$20,000 for that purpose.

In lowa, under the auspices of the militia and the Aero Club of lowa, \$10,000 having been raised by the latter. The Grinnell Aeropiane company of Grinnell has offered facilities for a station. ia Pennsylvania, under the ausidces of the militia and the Aero Club of Pennsylvania, two members of which, Messrs, Robert Glendingling and

Clarke Thomson, will contribute the use of their flying boats for this pur-In Washington (state), under the anspices of the militia and the Aero club of the Northwest, the members of which will lean the use of three aero-

planes for this purpose, in Washlagton, D. C., under the auspices of the militla, the national

aerial coast patrol commission and other organizations.
in Nebraska, under the auspices of the National Guard.

Officers from the following states are receiving training in aviation OFFICERS FROM MANY STATES RECEIVE the National Aeropinne Fuad: Arkansas, California. Colorado, Connecticut, District of Columbia, Georgia, Kansas, Kentucky, Minnesota, Mississippi, Nehraska, New Hampshire, New Jorsey, New Mexico, New York, North Carollaa, North Dakola, Ohio, Oklahoma, Oregon, South Carolina, Tennessee, Texas, Vermont, Virginia, West Virginia, Wyoming. This is but the first sien in the formation of aviation sections in these states.

The project to establish a chain of aerial coast defense stations niong the Atlantic, Gulf and Pacific coasts, at intervals of 100 miles, was fostered. This aero-radio system of coast defense has been judorsed by President Wilson, Secretary of War Garrison, Secretary of the Navy Daniels, and by the leading authorities on national defense. Forty-four aeroplanes will be needed to properly patrol all our coasts, and these, with the radio installation, recelving stations, hangars and other equipment, will cost about \$500,000 less than the price of a first-class submarino.

Aviators and aeropianes were provided at the expense of the National Aeropiane Fund for the maneuvers of the militia of the states of New York, Peansylvania and Vermont. Thus, for the first time in history, they were eaabled to maneuver under conditions closely approximating modern warfare. in which aircraft is a deciding factor.

The purpose of the National Aeropiane Fund is to promote peace—to place the nation in such a strong defensive position that no other nation will hazard the chance of attacking us if in addition to our defenses, we have a great fleet of aeropianes. That, and the fact that even such small nations as Bulgaria, Roumania, Spain and Switzerland outstrip us in aeronautic equipment. Bulgaria for instance, has over 300 aeropianes while we have about thirty.

That is the reason why so many ladies with the intuition and the generosity of the sex have made sacrifices to add to the fund. Many have given to the fund the price of a new spring hat and one lady, without ceremeny, sent her check for \$7,500-her peace offering.

Battles Won in the Factories

Organization of Industrial Forces Vital to Preparedness, Points Out Howard E. Coffin of Naval Consulting Board

By DAVID TUNNECLIFFE

In all of the work to prepare the nation against war most attention has been given to the urmy and lo the navy, for the opinion has prevailed that if we get legislation providing a larger army and a larger navy our policy of insurance against war would be complete. But over in Europe they have found that it takes at least three men working at top speed at home to keep one soldier at the front, and Howard E. Coffin, the moter-car builder, a member of the naval consulting board, declares that, even with a large army and a large may, H E COFFIN. the United States will be wholly unprepared nuless the

other nations of the world know that lack of them the industrial forces of the nation are organized and co-ordinated. To bring about that state of efficiency is a task of tremendous size, for, contrary to popular notions, we are not prepared to serve the guns of any country with shells in quantities that are really important. No American shell, it is said, has yet been fired from a French gan, and only 10 per cent of the ammunition England has used has come from this country. So the prevalent opinion that we are furnishing the munitions of war for the allies is muschievously mus-

"Eighty per cent of the industries of Enrope are working day and night on the production of materials for the lighting line," and Mr. Cellin. "These materials are practically all for the armies, because there have been few naval engagements and very little wastage. So you can say that Sil per cent of the industries in Europe are working on munitions for the armies. Now, we have no reason to beheve that in case we are drawn into any future war-in case we are really honest in our desire that we shall be prepared-that we can count on any other condition in this ountry than that existing abroad. In short, we must be prepared to preduce faster and in greater quantity the arms and munitions of war than can any other nation or any other two mutions which might attack us.

"We have in this country manufacturing and producing resources greater than those of any two countries in the world. If we have reward for any information Phone these resources so organized through an educational campaignthe safest and at the same time the cheapest kind of preparedness we can have—so that half, or in some important lines more than half, of the industrial equipment and resources of the world can step in behind our army and navy, we might term it the greatest insurance against war this country could possibly have.

"In the production of any war materials, such as rifles or shells for instance, there are certain ganges necessary, measuring tools and gauges for sizing different parts, etc. Those are being made in large part by three concerns which are manufacturing nearly all the gauges for the country. This is a general statement, of course, and there are some smaller concerns. The skilled labor employed on this work is specialized labor. It line block, while an abled-bodied man has to use up a box of matches to has been on this work for years, and could not be replaced in a long period | get a wood fire started to a heater that of time because gauge making is a craft which has grown up with these least draft enough to draw all the furalconcerns."

"Could not our industries quickly adapt themselves to turn out war material?" I saked.

"If," Mr. Coffin continued, "we should place an order in this country for 200,000 shells per day throughout the range needed in our general operations-some seventeen sizes-these concerns have computed the expenses and time required for the production of such gauges in the necessary quantity. They have figured that it would require from seventeen to twenty million dollars invested in the gauges themselves, and that it would litere personal individual battle fought require five years for their valuable equipment, working continuously, to produce the necessary quantities of such gauges; also from actual experience they have estimated the length of time such gauges could be used found in worthy conflict as nowhere before being replaced. After three thousand to ten thousand gaugings else. with an instrument of the accuracy required for this work, it means that either the surface must be renewed or the whole gauge scraped, because limits of perhaps a quarter of a thousandth of an inch cannot be maintained on account of wenr. This is one instance of what preparedness America is by congulation in smoke, means if we are honest about it and roully want it.

"Let me go back now to this question of how to standardize our, with the fluid as it is taken from the munition methods and of how we may best utilize the American undustries tree and after there has been suffibehind our fighting line. As I have said, some 80 per cent of the pro- clent evaporation the rubber residue ducing equipment of foreign countries is now working in the service of in the UB Islands the rubber workers the armies. Through our observations of these conditions during the past, use their months as "reforts" or "sepyear we have been forced to revise nearly all our ideas of modern warfare, araters," the tubber pellets as they am not speaking for the navy and army officers, because they must have known in some degree what was coming. But the manufacturers of this country have at last, through observation of foreign Imppenings, come to have some realization of the changed conditions of warfare.

"We have felt heretofore that with a big army and navy we would surely be well prepared. We have now found that with a big army and navy we may be in a worse position than without them, or may be even yet in a position where some of the pacifists would have us. With a big army and navy we might try to run some bluff which would be called, and when the showdown came we would find that the army and navy were merely the first breaker, and that behind the lines we had nothing to back them up.

"Industrial preparedness in this country," continued Mr. Coffin, means we shall have to be so prepared through an educational policy that our industries will be in a position within a month or two months or three months, as the case may be, to swing from their regular lines of produc tion on to the production of the munitions required for military purposes and go on without delay with such deliveries as will keep our fighting lines supplied."

The Nonproducers

A favorite argument of the antimilitarist is that the nation loses much because the soldier is a nonproducer. This argument, however, is no sounder than is that of the 'burden' of military expenditure. 'Nonproducer' is a much-abused term. If it means all those who are not actually growing or manufacturing some article, then we must include min isters, teachers, lawyers, bankers, merchants, and certainly those engaged in all sorts of insurance, in which case the fact that a soldier does not continually manufacture or grow things himself is no reproach.
